Subject Index to Volume 28

augmentation of decision procedures, 257
autarkic computation, 321
automated deduction, 337
automated theorem proving, 205, 307

combining decision procedures, 257
competition, 307
computable set theories, 397
computer algebra, 321
congruence class rewriting, 35
conjunctive normal form, 417

database updates, 1
decision procedures, 257
deductive databases, 1
diophantine equations, 35
duality, 1

finitely presented groups, 235
(first-order) modal logics, 397
formal proof, 321
formal verification, 337

global SLS-resolution, 53
group diagrams, 235

infinite-state systems, 337

Knuth–Bendix completion procedure, 235

linear tabling, 53

modal logic, 143, 205
model generation, 1, 205

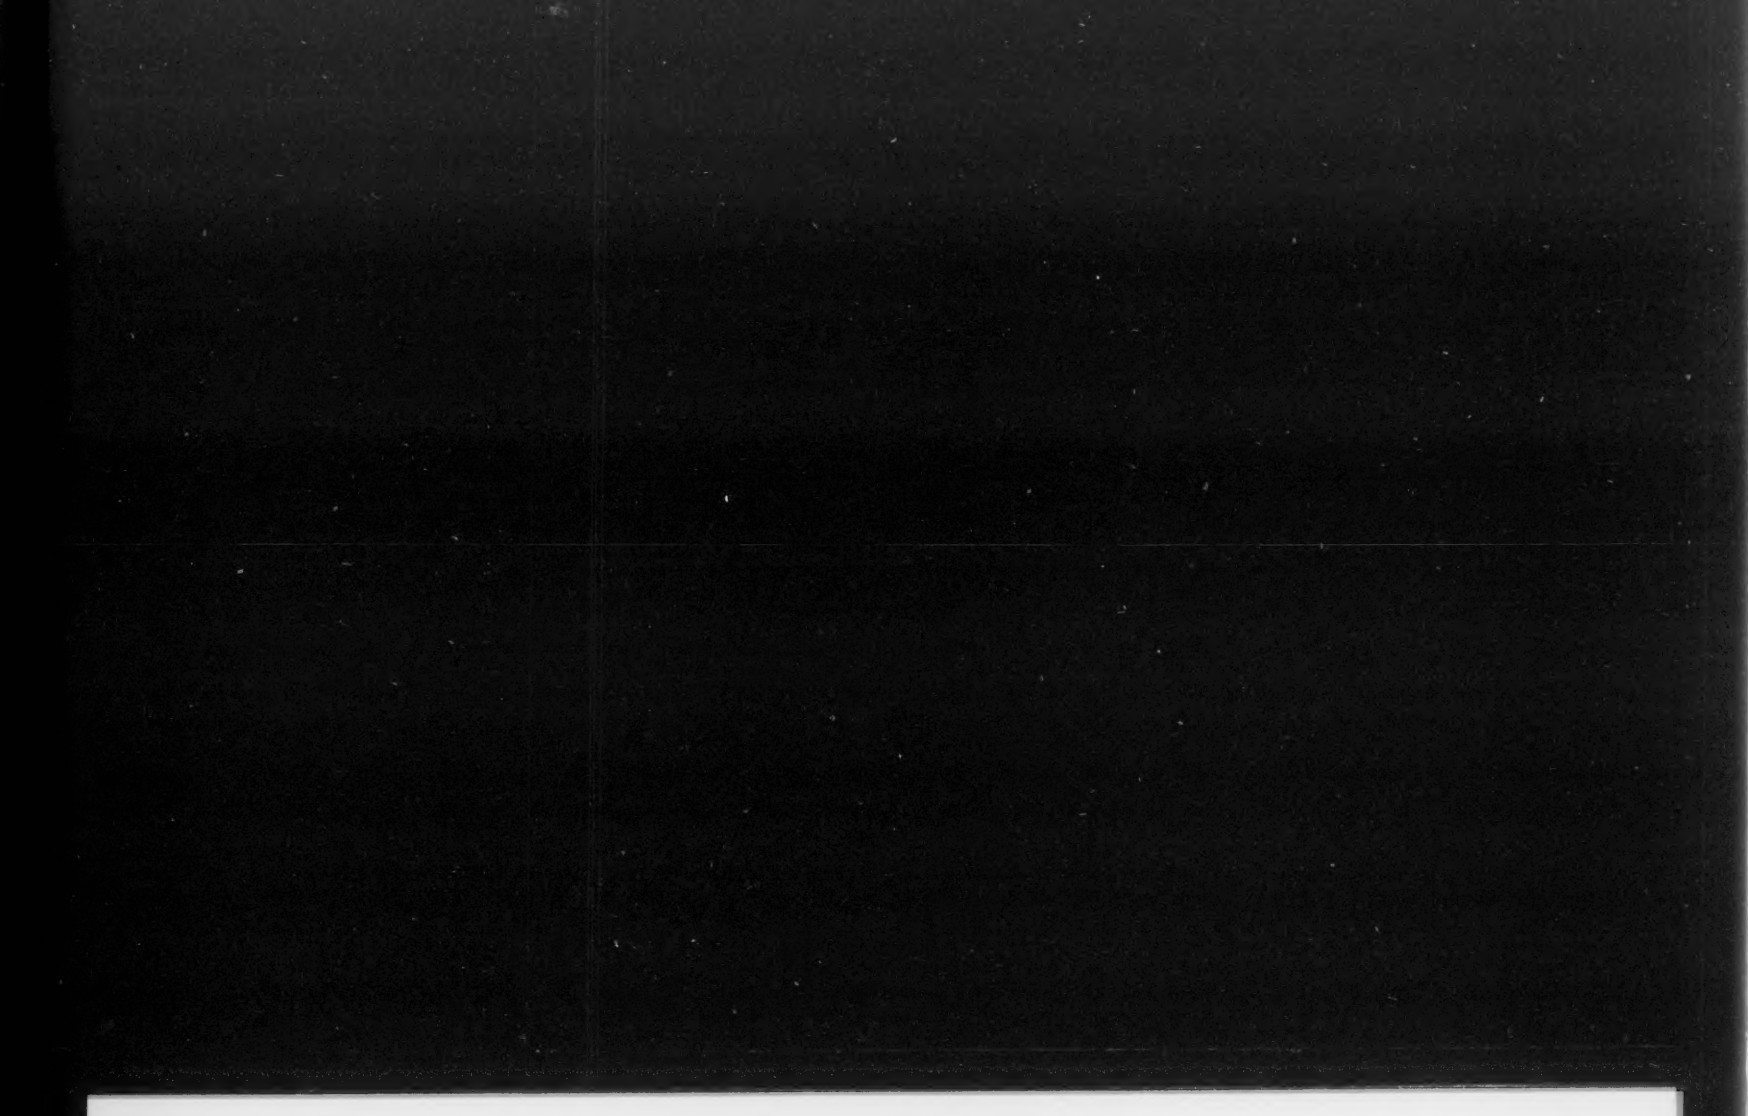
optimization, 173

poset searching, 35
primal–dual strategy, 371
procedural semantics, 53
proof development, 321

quantified Boolean formulas, 101
query processing, 1

relative proof complexity, 205
relative search space complexity, 205
resolution decision procedures, 205

SAT algorithms, 101
SAT-based decision procedure, 143
satisfiability, 173, 417
satisfiability algorithms, 371
satisfiability testing, 205
simulation, 205
SLG-resolution, 53
SLT-resolution, 53
string-rewriting, 337

tableaux, 173
tableaux proof systems, 205
theorem proving, 257
translation methods, 397


well-founded semantics, 53
